

BALLERUP

Developing the town centre of Ballerup - focus on people

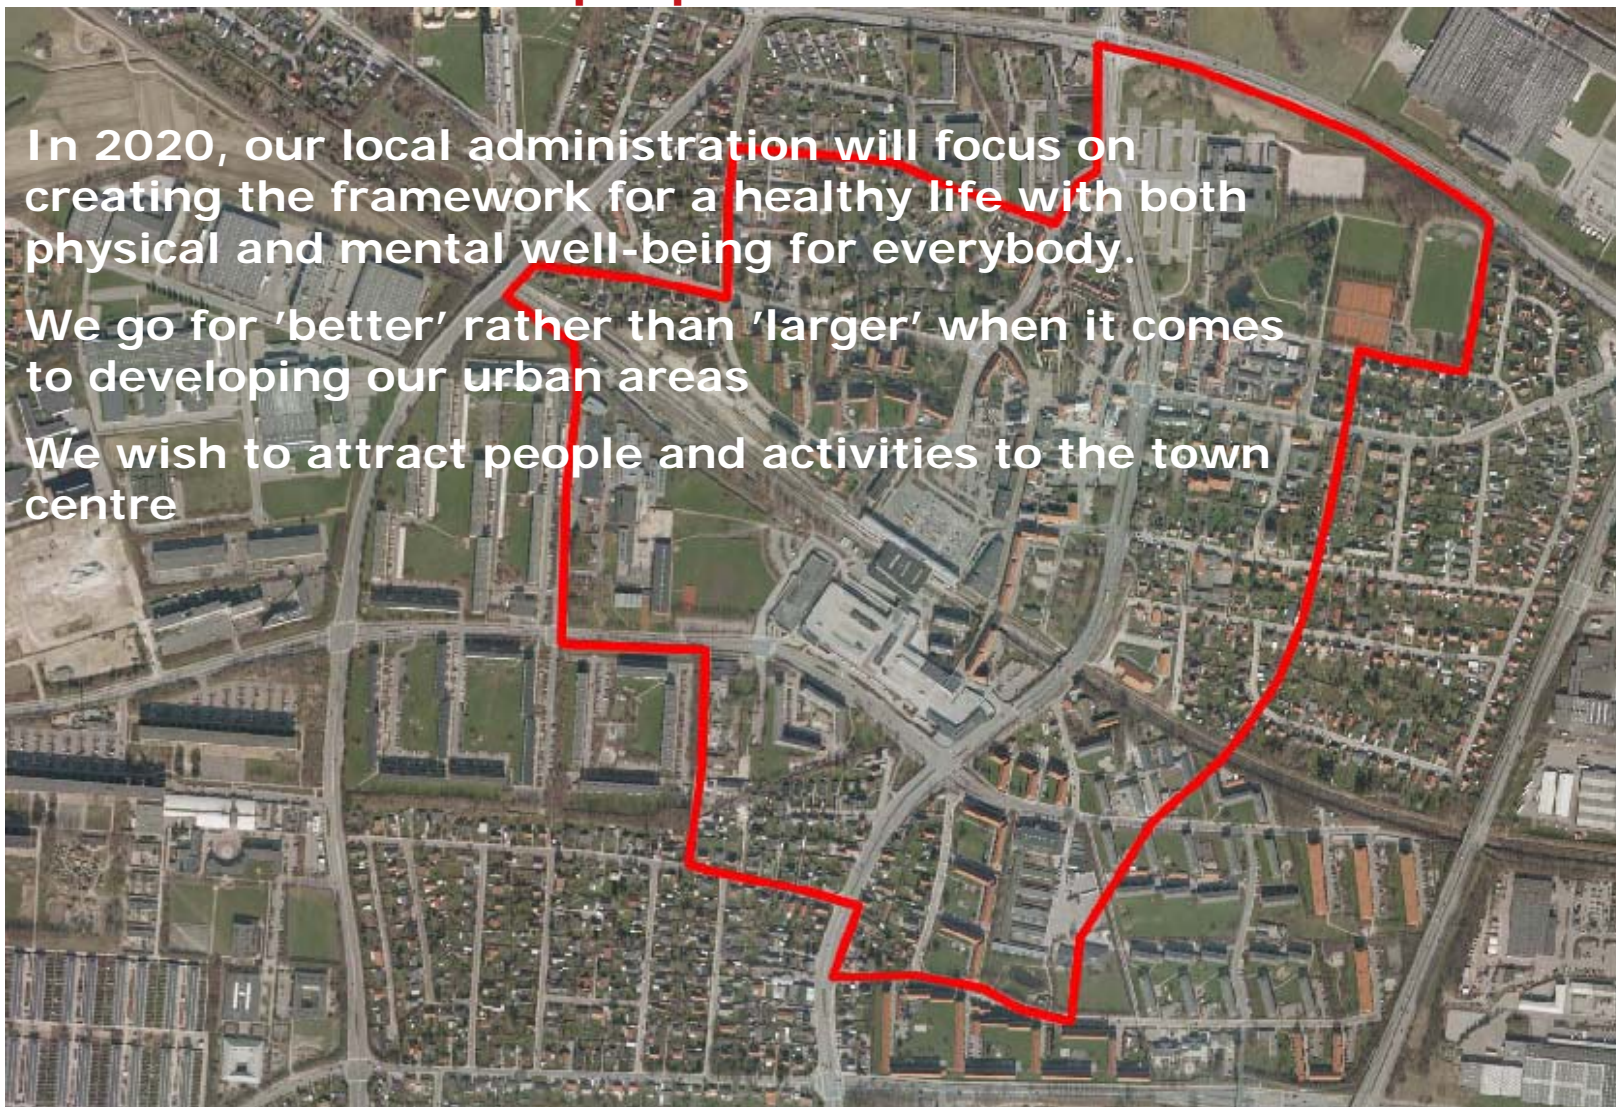

Vision: We focus on people

In 2020, our local administration will focus on creating the framework for a healthy life with both physical and mental well-being for everybody.

We go for 'better' rather than 'larger' when it comes to developing our urban areas

We wish to attract people and activities to the town centre

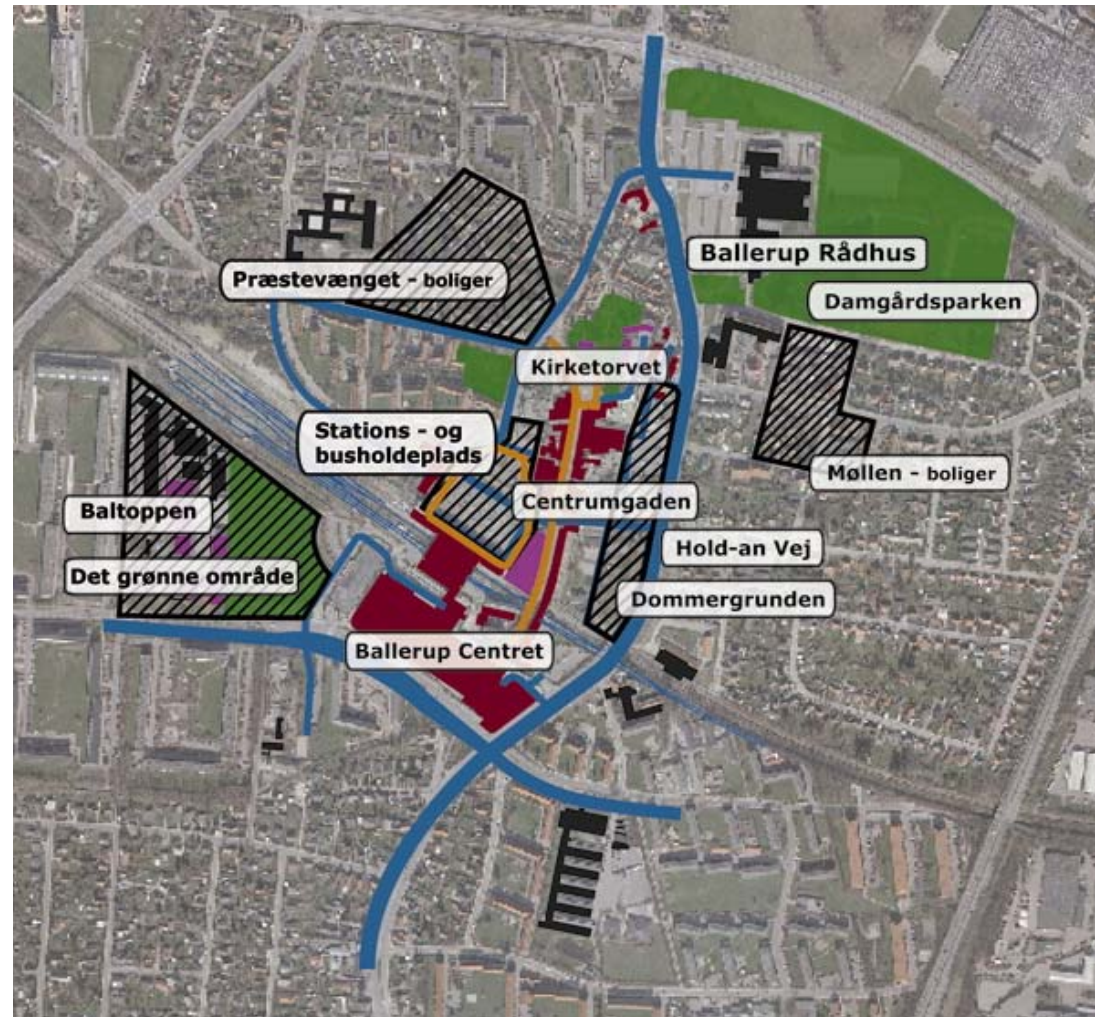

Challenges

- Several major roads and a railway cut through the town
- Cars and parking spaces
- Boring urban spaces
- Lack of activities and street life
- Too few housing units in the town centre
- Lack of context

Intensions

- A town for pedestrians and bicycle riders – good path connections
- Make Ballerup a lively town
- More cultural activities
- More people visit Ballerup
- More people live in Ballerup
- Better green connections
- More safety and security

- **Initial involvement phase**
 - Interviews
 - Open workshops
 - Citizen survey
 - **Competition**
 - Open process
 - Inter-disciplinary teams
 - Workshops with presentation of the teams' work in progress – an opportunity to ask questions and make suggestions.
 - Output of the competition: a development plan with detailed project descriptions.
 - **Masterplan**
 - The competition project are expected to form the basis for a master plan, before the actual development process is initiated. Citizens will be involved in this phase, too.
 - **Here and now**
 - Initiate activities with instant effect – it is going to be a long process...
- Important that citizens and stakeholders feel ownership of the project right from the start and all through the process.**
